REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Upon further consideration, NU-10 is not isostructural with ZBM-30 for the reasons noted in applicants' response and the prior art rejection is not proper.

At the outset, it should be noted that the phrase "synthesized with a structure directing agent consisting essentially of triethylenetetramine" is a process limitation in a product claim. Therefore, claims 1-6 are product-by-process claims. For purposes of examination, product-by-process claims are not limited to the manipulation of the recited steps, only the structure implied by the steps. See MPEP 2113. (The catalyst would <u>not</u> contain triethylenetetramine because the triethylenetetramine would be removed when the zeolite is calcined.)

Turning now to the prior art, catalysts are known that contain a mixture of matrix, ZBM-30 and a hydro/dehydrogenating metal. See, e.g., Benazzi et al. (WO 01/64339); Benazzi et al. (WO 02/42890). The references do not specify which directing agent is employed to form the ZBM-30. Therefore, it would have been obvious to one of ordinary skill in the art to have employed any structuring agent known to form ZBM-30, including triethylenetetramine or tetramethylenediamine. However, in the present case, applicants have shown that the use of triethylenetetramine results in an unexpectedly improved catalyst as compared to, for example, a ZBM-30 made with hexamethylenediamine. See Examples 1, 2, and 4 of the specification. Therefore, the prior art fails to disclose or suggest a catalyst containing ZBM-30 made from triethylenetetramine, a matrix and a hydro/dehydrogenating metal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (572)272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
